LANDSCAPING FOR WILDLIFE WORKSHOP AGENDA

Wildlife viewing is often a primary objective for people who plant grasses, forbs, shrubs, and trees at their homes. Chances are, if the plant is colorful, fragrant, and “bushy” it will be attractive to hummingbirds, bees, and butterflies. But what other features can be created, enhanced, or protected for wildlife?

Come learn about soft and hard mast producing shrubs, how to design a landscape for wildlife, nest boxes, ponds, and bird baths, winter feeding, attracting butterflies, and much more. With over 300 species of vertebrate wildlife to choose from, there’s a good likelihood that with some planning, you’ll be successful in attracting the watchable wildlife you desire.

Welcome9:00–9:15 am

*Jeff Parsons, Barn Beach Reserve
Andy Perleberg, WSU Extension*

**Keynote: A Wildlife Watchers
Landscape9:15–11:30 am**
